

## **Technology Supplies Ltd & Dangerous Goods**

Due to current UN legislation with regards to the transportation of Dangerous Goods, Technology Supplies Ltd (in conjunction with our parcel carriers) is permitted, under ADR regulations, to ship 'Limited Quantities' (LQ) of these goods via road to mainland UK destinations only.

### **Dangerous Goods – Definition**

These are substances classified by the United Nations (UN) as dangerous and any goods specified as such under IATA (International Air Transport Association), IMDG (International Maritime Dangerous Goods) and ADR (Accord Dangereux Routier) regulations.

### **Important Facts & Information**

Transportation of Dangerous Goods is a risk when they are not correctly packed or handled. If the goods are hidden, declared incorrectly, left completely undeclared, packed or labelled incorrectly, health and safety is compromised.

### **Packaging**

Dangerous Goods shipments must be prepared in accordance with the relevant Dangerous Goods Legislation. These goods must be correctly packed, marked and labelled. Due to regulations and compliance with shipping in 'Limited Quantities', some products may be required to be packaged separately or segregated from other dangerous goods.

### **Training**

Technology Supplies Ltd has completed training in the "Carriage of Dangerous Goods by Road & Sea". Our aim is to ensure that the Technology Supplies Ltd complies with the relevant requirements and regulations for the safe transportation of Dangerous Goods.
