

910-289 SPECIAL NEEDS POTTERS WHEEL

The Product

The Gladstone Special Needs wheel has been designed with quality, reliability and ease of use in mind. Incorporating many of our standard features this wheel comes with a few extra advantages, the splash tray and wheel head are standard size but the whole section can be moved up and down by using the crank handle to adjust it to suit the height you require. With the wide splayed legs you can locate a wheel chair or normal chair to a comfortable position for throwing. Use the screw down feet to stabilise the wheel, whilst unscrew the feet and the wheel becomes easy to roll about to be put to the side out of the way or moved to another position.
